Our Livable World - Marc Schaus - 2020-10-13

A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States' accelerated plans to combat the existential threat of climate change finally give reason to hope. In *Our Livable World*, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, "smart highways" designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel created from landfill trash—and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. *Our Livable World* features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. "An important book that shows the dawn of a new kind of environmental movement—an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us." —Katie Patrick, author of *How to Save the World*

Handbook of Firearms and Ballistics - Brian J. Heard - 2011-08-17
The updated second edition of *Handbook of Firearms and Ballistics* includes recent developed analytical techniques and methodologies with a more comprehensive glossary, additional material, and new case studies. With a new chapter on the determination of bullet caliber via x-ray photography, this edition includes revised material on muzzle attachments, proof marks, non-toxic bullets, and gunshot residues. Essential reading for forensic scientists, firearms examiners, defense and prosecution practitioners, the judiciary, and police force, this book is also a helpful reference guide for undergraduate and graduate forensic science students.

Introduction to Ergonomics, Second Edition - Robert Bridger - 2008-06-26

When faced with productivity problems in the workplace, engineers might call for better machines, and management might call for better-trained people, but ergonomists call for a better interface and better interaction between the user and the machine. *Introduction to Ergonomics, 2nd Edition*, provides a comprehensive introduction to ergonomics as the study of the relationship between people and their working environment. The author presents evidence from field trials, studies and experiments that demonstrate the value of ergonomics in making the workplace safer, more error resistant, and compatible with users' characteristics and psychological and social needs. Evidence for the effectiveness of each topic is incorporated throughout the book as well, which helps practitioners to make the case for company investment in ergonomics. In addition, the author outlines international standards for ergonomics that influence engineering and design and pave the way for a more precise form of practice. Extensively revised and updated, this second edition explains the main areas of application, the science that underpins these applications, and demonstrates the cost-effectiveness of implementing the applications in a wide variety of work settings.

Visions of the Self: Rembrandt and Now - - 2020-09-15

A legendary painting by Rembrandt forms the centerpiece of this exploration of self-portraits by leading artists of the twentieth and twenty-first centuries. Published to commemorate an exhibition presented by Gagosian in partnership with English Heritage, this stunning volume centers on Rembrandt's masterpiece Self-Portrait with Two Circles (c. 1665), from the collection of Kenwood House in London. The painting is considered to be Rembrandt's greatest late self-portrait and is accompanied here by examples of the genre from leading artists of the past one hundred years. These include works by Francis Bacon, Jean-Michel Basquiat, Lucian Freud, and Pablo Picasso, as well as contemporary artists such as Georg Baselitz, Glenn Brown, Urs Fischer, Damien Hirst, Howard Hodgkin, Giuseppe Penone, Richard Prince, Cindy Sherman, and Rudolf Stingel, among others. Also featured is a new work by Jenny Saville, created in response to Rembrandt's masterpiece. Full-color plates of the works, generous details, and installation views of the exhibition accompany an expansive essay by art historian David Freedberg that provides a close look at the self-portraits created by Rembrandt throughout his life and considers the role of the Dutch master as the precursor of all modern painting.

Numerical Methods for Engineers - Steven C. Chapra - 2006

The fifth edition of "Numerical Methods for Engineers" continues its tradition of excellence. Instructors love this text because it is a comprehensive text that is easy to teach from. Students love it because it is written for them--with great pedagogy and clear explanations and examples throughout. The text features a broad array of applications, including all engineering disciplines. The revision retains the successful pedagogy of the prior editions. Chapra and Canale's unique approach opens each part of the text with sections called Motivation, Mathematical Background, and Orientation, preparing the student for what is to come in a motivating and engaging manner. Each part closes with an Epilogue containing sections called Trade-Offs, Important Relationships and Formulas, and Advanced Methods and Additional References. Much more than a summary, the Epilogue deepens understanding of what has been learned and provides a peek into more advanced methods. Approximately 80% of the end-of-chapter problems are revised or new to this edition. The expanded breadth of engineering disciplines covered is especially evident in the problems, which now cover such areas as biotechnology and biomedical engineering. Users will find use of software packages, specifically MATLAB and Excel with VBA. This includes material on developing MATLAB m-files and VBA macros.

They Can't Touch Him Now - James Williamson - 2015-04-08

Jimmy was only nine years old when he was molested and sexually assaulted in London's dingy East End. He struggled to keep his dark secret, while coping with being adopted and his illiterate father's violent outbursts. Desperately needing to be loved, Jimmy accepts an offer of 'conditional kindness' from Tom, his scoutmaster. Now, after a lifetime of secrets, his story can be told as Tom is now dead, so. "They Can't Touch Him Now"

The Tractor in the Haystack - Scott Garvey -

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

Don't Just Sit There, DO NOTHING - Jessie Asya Kanzer - 2022-03-01

47 hip, hilarious and down-to-earth meditations on struggle, triumph, mindful living, and more. "Jessie has used her intuition to thrive and now shares her inspirational story with others. She is a force." —Laura Day, NYT bestselling author of Practical Intuition and The Circle. "She's at once frank, funny, poignant. I laughed out loud and nodded in agreement as I wiped away a tear." —Jen Pastiloff, author of the national bestseller On Being Human. "Jessie Asya Kanzer is like a taoist Anne Lamott, and she's written a practical and actionable guide." —Joel Fotinos, Vice-President and Editorial Director, St. Martin's Essentials Here are 47 inspirational pieces that are smart, hip, accessible, and rich with insight; Jessie Asya Kanzer's bite-sized stories of struggle, triumph, and contemplation based on sharp observations and anecdotes from her own life, provide a quick burst of mindfulness. Each chapter begins with a verse from the Tao, followed by anecdotes and observations that give the teachings of Lao Tzu applicability to contemporary life. Each chapter concludes with a "Do Your Tao" section that offers an actionable step that gives the reader a sense of grounding and fluidity. Chapters include: Success Sucks (Sometimes), F*uck This, I'm Water, I Love You, I Not Love You, The Tao of Babushka, Mystics Wear Leggings

Dying to Sea - Frank Heavey - 2005-05-05

For over a century, the sands off Chatham, Cape Cod, held an explosive secret that could bring fame and fortune to those who knew it-until now. When friends Matt Gallagher, Tucker McKinney, and Annie Hopewell come to Chatham for one last summer together, they stumble upon an elusive clue to solving the mystery of a Confederate ship's lost cargo of gold. But just as they learn the value of their discovery, they become embroiled in a life-and-death struggle with professional felons, Carson Ridder and Buster Sykes-ruthless men who will stop at nothing to satisfy their greed. Hunted by Ridder and Sykes and wanted by the police, Matt, Tucker, and Annie embark on a race against time that takes them from the beaches of Chatham, to the secret passages of Harvard, and finally to the dunes of Monomoy Island-where they must solve the mystery or lose their lives.

Invisible Jumpers - Joseph Ford - 2019-09-26

Photographer Joseph Ford and knitting pro Nina Dodd have dedicated more hours than is reasonable to creating bespoke jumpers (for both humans and animals) that blend seamlessly into their surroundings - from bus seats to bushes, carpets to coastlines. The images are executed with such painstaking precision that should the camera, or jumper for that matter, move by an inch the illusion would unravel. The book will contain images featuring 25 knitted pieces alongside text including an introduction by a top arts writer.

Scroll Saw Handbook - Orion Publishing Group, Limited - 1987-02

Into a Heart of Darkness - Robert Mellott - 2018-04-09

Dawn is a normal suburban high school senior living Saratoga Springs, New York. Her father is an expert in legends and myths and is a professor at the nearby college. She is a good looking popular girl with a boring mundane life until a new girl moves into the neighborhood. Grace is shy and looks like she stepped out of the 1940's and makes quite an impression with the kids at school. Dawn decides early on to befriend her even though she will lose her social status and takes a seat at the Nerd Table. Grace tends to be strange and keeps to herself except when around Dawn and with Dawn's help Grace blossoms. After Brandon, the captain of the football team asks Dawn out her life becomes a roller coaster of emotions and things become even more twisted after Grace's brother Max arrives and the two foster a relationship that thrusts her into a dark world where nothing is as it seems.
